

# **Solutions for sustainable logistics**

## FLC mission

---

Freight Leaders Council was **born in Milan in 1991** as a free private lobby, nonpartisan and no-profit **among key actors having a role in supply chain** with the aim of contributing to the development of **a more efficient, sustainable, and competitive logistic industry.**

FLC is very active in investigating main trends of the sector throughout studies and projects delivering **expert views, evaluations and guidelines addressed to central and local governments, stakeholders and citizens.**

## FLC goal

---

- To contribute to the **sustainable development of goods transport** by promoting co-modality and intermodality
- To support the development of **logistic know how and innovation** with studies, projects and proposals capturing new logistic market trends
- To support **networking** among members
- To identify and welcome logistic market **newcomers**
- To represent a national and international **Logistics Think Tank**
- To exercise a role of **social advisor and political service**

# FLC and market challenges

---

FLC aims to give to stakeholder accurate information and effective know how to manage actual and future logistics challenges by mean of:

- Constant relationship with the **regional peculiarities** and with economic society as a whole
- Identification of **innovative solutions**, which develop opportunities and enable the transformation processes and the overall development of the sector
- **Specific networking**, which interacts with other economic sectors, generating valuable personal relationships
- **Focus on technological innovations** that enables the cultural changes in the sector
- Attention to the **new generations** according to criteria of equity and excellence
- New **model of lobby** that, with the active contribution of the members, connect logistic industry needs with broader Italian economic development policies

# The Logistics Think Tank

---

It is an **initiative** coordinated by Freight Leaders Council, which **brings together best intelligence of transport and logistics**, both in scientific and business sectors, to focus on specific subjects of interest as suggested by stakeholders and giving proactive answer to actual and forthcoming logistics challenges.

TTL goal is bring sustainable logistics (from an environmental, ethical, economic and social point of view) **to the kernel of national industrial development policies.**

## FLC Young, our nowadays

---

FLCY includes several best under 35 logistics and sustainability experts, that joined the association to start a **mutual understanding process across different age groups** looking together forward to sustainable development of the sector.

FLCY benefits of its own autonomous structure, active in research and understanding **new logistics trends**. FLCY actively contributes to every activity of FLC including the finalisation of reports, scientific publications, participating in networking activities also.

# FLC Scientific Committee

---

Established in January 2019, FLC Scientific Committee brings together outstanding academic sector experts that demonstrated to be effectively active in the transport and logistics sector. The Committee has the objective of supporting the association in the activity of **research, analysis and study** of the items related to the sustainable transport of goods and logistics. Belongs to the Committee the following professors:

- Professor **Maria Rosaria De Blasiis**, Università Roma Tre
- Professor **Pierluigi Coppola**, Politecnico di Milano
- Professors **Damiano Frosi** and **Marco Melacini**, "Gino Marchet" Contract Logistics Observatory of the Politecnico di Milano
- Professors **Luca Persia** and **Andrea Campagna** of the Research Center for Transport and Logistics (CTL) of the Università La Sapienza di Roma
- Professor **Vittorio Marzano** of the Federico II Università di Napoli
- Professors **Francesco Timpano** and **Luca Lanini** of the Università Cattolica di Milano
